Projects

- **Lending Application:** *May 2025*
  A one-to-one lending application is a digital platform that facilitates direct borrowing and lending between individual users, typically without the involvement of traditional financial institutions like banks. This type of platform is often known as a peer-to-peer (P2P) lending application.

- **Water Potability Predictor(ML Based Project):**
  Nov 2025, Water Potability Predictor is a machine learning-based web application that classifies water as potable or non-potable using a LightGBM model trained on nine key physicochemical parameters. The system utilizes Flask for the backend and HTML, CSS, and JavaScript for an interactive user interface with real-time validation and visualizations.
